INTRODUCTION

International Foundation Group (IFG) is proud to be one of the leaders in the field of specialist geo-technical and foundation engineering & has experience through completion of many projects throughout the United Arab Emirates.

IFG has invested heavily in specialized rigs and equipment in order to complete the most challenging and complex foundations and tunnelling works, all to the complete satisfaction of clients' challenging and complex construction needs.

IFG is managed by a team of experienced professionals leading a team of competent staff comprising Design Engineers, Quantity Surveyors, Project Managers and Site Engineers. Equipment and technique used are carefully selected to suit prevailing ground and environmental conditions.

All specialist equipment is owned and was purchased purchased from leading equipment and Japanese foundation and micro-tunnelling equipment manufacturers. We have undertaken projects for deep foundation works of high rise buildings (commercial & residential) & bridges etc. and we have completed some of the longest, largest and deepest micro-tunnel runs in U.A.E. to date.

Having state-of-the-art technologies, experienced and highly qualified technical and administrative staff, we can boast of excellence in projects undertaken and client satisfaction.

The repertoire of services provided by **International Foundation Group** range from preliminary assessment of Geotechnical works, conceptual and detail design to the actual construction of the works. With Creativity and innovation in construction technique IFG has some of the most renowned in the developers region as their clientele; a fact that is testimony to the credibility & efficiency of the organization.

OUR MISSION

KEY PERSONNEL

OUR DIRECTOR

DR. KHALIL CHARIF

At **International Foundation Group (IFG)** our passion for progress drives us to deliver the best underground solutions for gigantic towers & futuristic infrastructure projects of U.A.E. on a previously undreamt-of scale. With leading innovation in the development of underground engineering techniques, IFG is able to combine its local knowledge & experience to deliver customized solutions in all areas of foundation engineering.

In the deep foundation industry, there is no such thing as overnight success. It takes years of commitment, backed by a track record of quality and performance, for a company to earn leadership position in this competitive market. IFG is a company which has earned this position and I would like to credit our strength and success to the hard work and character of our team.

IFG strives to advance the industry with state of the art piling, shoring & tunnelling equipment. We have a reputation for solid achievement witnessed through the successful completion of numerous complex projects across the U.A.E. We have risen to the challenges involved in providing safe foundations and basements to increasingly large and heavily loaded structures in the desert, city centres and water-fronts.

Today IFG is much more than a premier foundation & shaft contractor with a wide range of technologies in its toolbox, including piling systems, concrete diaphragm walls, excavation support and earth retention systems, along with the expertise and resources to develop and deliver the optimum solutions.

International Foundation Group owns a fleet of modern micro-tunnelling boring machines that enables the company to excel in performing Non-Disruptive Road Crossing (NDRC).

International Foundation Group is certainly recognized as one of Dubai's foremost deep foundation specialists and one of the leading companies in Micro-tunnelling, and is achieving success through a unique culture that values and fosters the development of its people and its reliable modern equipment.
